KRISHNA NITIN MANTRI

+91-9503389500 | krishnamantri950@gmail.com | LinkedIn | GitHub | Portfolio

Pune, Maharashtra, India

EDUCATION

- **Dr. D. Y. Patil Institute of Technology, Pune** — *B.E. Electronics & Telecommunication Engineering*
  CGPA: **8.88 / 10** | 2022 – 2026
- **Mahatma Basweshwar College, Nanded-Waghala** — *12th (MSBSHSE)*
  Percentage: **87%** | 2022
- **Podar International School, Parbhani** — *10th (CBSE)*
  Percentage: **93%** | 2020

WORK EXPERIENCE / INTERNSHIP

Web Developer Trainee — City Service Link (IT Product & Services) | Dec 2024 – Jan 2025

- Built a scalable worker-booking web platform using **Django, DRF, SQLite, HTML, CSS**.
- Implemented secure authentication, role-based access, and automated service cost calculation.
- Designed optimized backend APIs and responsive frontend for smooth user experience.

PROJECTS

1. **CardioLink – IoT Powered Cardiac Monitoring System** | Python, Flask, CNN+LSTM, React, IoT | Link
   - Designed a real-time cardiac anomaly detection system using **MAX30100 sensors (HR, SpO_2, HRV)**.
   - Trained a **CNN+LSTM** model on ECG patterns for anomaly classification.
   - Built Flask APIs to fetch data from Supabase, generate graphs, and produce PDF health reports.
   - Integrated React dashboard for real-time monitoring and analysis triggering.

2. **Market Regime Detector** | Python, Scikit-learn, Pandas, NumPy, Streamlit, yfinance | Link
   - Built Python market regime detector with statistical algorithm and ML models to identify trending vs. ranging financial market conditions.
   - Processed stock/option data via backend APIs using volatility clustering, autocorrelation metrics, and unsupervised learning for accurate regime classification.
   - Demonstrated skills in data structures, time series analysis, NumPy/Pandas/SciPy, and scalable GitHub-hosted project for live market monitoring.

3. **Insurance Premium Predictor** | Fast API, Scikit-learn, Pandas | Link
    - Built ML-based system to predict insurance premium amounts from structured datasets
    - Deployed REST API using **Fast API + Pydantic** for real-time premium estimation.
    - Improved forecasting accuracy and usability for insurance analysis.

4. **E-Commerce Platform** | Django, DRF, Tailwind CSS, JavaScript | Link
    - Developed full-stack e-commerce application with authentication, cart, orders, and admin panel.
    - Integrated **Razor pay** for secure online payments and order verification.
    - Designed responsive UI and REST APIs for smooth shopping experience.

TECHNICAL SKILLS

- **Languages:** Python, C/C++, JavaScript
- **Backend:** Django, Django REST Framework, Fast API, Flask
- **Frontend:** HTML5, CSS3, Tailwind CSS, React.js
- **Databases:** SQLite, MySQL
- **Machine Learning:** Scikit-learn, CNN, LSTM, NumPy, Pandas, Matplotlib
- **Tools:** Git, GitHub, VS Code

HONORS & ACHIEVEMENTS

- Participant – **Smart India Hackathon (SIH)**
- Amazon ML summer school student
- District Level Football Player
- Department Cricket Team Player
- Abacus Level 2 Achiever
- Model United Nations Participant

CERTIFICATIONS

- Machine Learning Program (Supervised, Deep Learning, Generative AI, LLMs)
- MATLAB Onramp
- Data Analytics with Tableau

INTERESTS

Cooking, Cricket, Football, Stock Market Analysis, Trekking, Binge Watching
